SUMMARY

For the past 3 years as a Software Developer, I have focused on developing scalable and well-documented code focusing on RESTful APIs. I prioritize timely delivery of features, with a strong emphasis on maintaining code quality. Currently, I'm advancing my full-stack expertise through an intensive bootcamp, mastering JavaScript frameworks like Node.js, Express.js, React.js, and Next.js. I enjoy working collaboratively but can also take on projects independently.

EXPERIENCE

Fullstack Developer

Fiberwide S.p.A.   📅 10/2022 - 01/2025   📍 Turin, Italy

- Designed and developed a scalable and high-performance RESTful API, handling 10,000+ concurrent requests while ensuring maintainability and robust functionality.
- Designed and developed a modern, responsive UI using React.js, enabling seamless interaction with the API and supporting around 1,000 monthly active users.
- Implemented secure authentication and authorization features, protecting over 500 API endpoints and enhancing system security.
- Optimized database interactions, reducing query response times by about 30% through advanced query techniques for efficient data retrieval and manipulation.
- Refactored legacy website code to a modern, scalable architecture, improving performance by 40% and enhancing user experience.
- Developed role-based dashboards and admin panels for 5 different user roles, delivering a tailored experience and improving user satisfaction by 25%.

Junior Backend Developer

Morecognition   📅 07/2022 - 10/2022   📍 Turin, Italy

- Developed and executed multiple API test suites in Rust, ensuring 95%+ test coverage and improving API reliability and performance.
- Improved onboarding and integration efficiency via comprehensive API documentation using Swagger for over 100 endpoints.

EDUCATION

Fullstack Web Development Bootcamp

Spiced Academy   📅 02/2025 - 05/2025   📍 Berlin, Germany

Bachelor of Science in Computer Engineering

Politecnico di Torino   📅 10/2017 - 07/2022   📍 Turin, Italy

PERSONAL PROJECTS

Realtime Chat App

🔗 https://github.com/DanielCyubahiro/chat-app

A full-featured realtime chat application designed to offer seamless one-on-one and group communication. This app supports friend requests, real-time messaging, group chat management, and much more — all with a clean and modern UI.

#Next.js #Typescript #Convex #Clerk

Fully Featured RESTful API

🔗 https://github.com/DanielCyubahiro/mvc-rest-api

A RESTful API providing CRUD functionality, authentication and authorization features with an MVC architecture.

#Node.js #Express.js

Movie Bingo

🔗 https://github.com/DanielCyubahiro/bingo-app

Movie Bingo is a fun, interactive game for virtual movie nights. Perfect for engaging movie nights with friends!

#React

Online Art Gallery

🔗 https://github.com/DanielCyubahiro/super-dollop

A modern Online Art Gallery built designed to showcase my ability to leverage the entire Next.js feature set in a real-world project.

#Next.js #React #Zustand

SKILLS

JavaScript	Node.js	Express.js
React.js	Next.js	MongoDB
Typescript	Redux	Zustand

PHP	Laravel	MySQL	PostgreSQL

Git	Agile Methodologies	REST APIs
